

## THEIR EXPERIMENTS WITH COOKING

There is no bound to the creative canvas of a chef. This was proved by the year 6 students of the St. Christopher's school when they displayed their culinary skills taking part in the Master Chef Challenges. After meeting tough challenges the best team from each class entered the finals judged by Executive chef

at the Movenpick, Bahrain Alfred Zuberbuehler and Wendy Bataineh, Head of the Junior School at St Chris.

The winning team, Ahmed, Nabeel, Iby and Muffasir from 6A were rewarded with a tour of the Movenpick kitchens where they made their own cookies and enjoyed lunch in the Movenpick restaurant!

Children enjoy interacting with informative and thought-provoking exhibits at Sultans of Science.

### Sultan of Science amazes audience

Global travelling exhibition 'Sultan of Science' continues to amaze audiences in the Bilim Merkezi Science Centre in Konya Turkey, with visitor numbers exceeding the venue expectations. The exhibition will be open until

the January 28, 2015.

The Turkish audience gets an insight through Sultans of Science into the Islamic golden age and how this era had major influences on modern medicine, mathematics, astronomy and more. The exhibition will

allow the visitors to enjoy hands on interactivity, which increases knowledge with the combination of technology and inventions of the period.

After being hosted at Bilim Merkezi Science Centre, the exhibition will continue traveling across the globe.

Head of School for ICT & Web Media, Trevor Prendergast delivers a speech during the forum.

### Journey to success

Bahrain Polytechnic BICT and Web Media Industry Forum took place at the Ramee Grand, bringing together industry partners, Polytechnic graduates and faculty members in a forum to witness the graduates' success stories.

More than 80 participants attended the occasion in which graduates shared their experience in developing a

smartphone application for Bahrain Airport Company.

The event brought over many delegates from key companies in various industries, such as telecommunications, financial institutions, governmental entities and many others, some whom expressed their experiences when placing the Polytechnic students throughout their internship courses and offering them jobs

as they proved their high level employability and technical skills.

Dr. Mohamed Al-Aseeri, Acting CEO of Bahrain Polytechnic, reiterated the government educational institutions' aim is to graduate students with corporate experience, believing that the youth of the Kingdom will lay the foundations of Bahrain's 2030 Vision.
