

TL7201

International Air Cargo

Course Aim To introduce students to the practise of international air cargo transport operations with special reference to: The components of International Air Cargo operations / How NETS theory can be applied to the conduct of international air cargo operations / How contemporary issues in air cargo operations may impact on Bahrain and the Gulf Region

Short Title International Air Cargo
Faculty Business
Polytechnic Level
Credits 15
 45 credits at level 6 (or BPQF level 5 or a combination thereof) (courses from the BILM PAD only) + 15 credits of English (or equivalent)
Pre-requisites
Co-requisites Nil
Anti-requisites TLB6201

Version 1
Effective From September, 2016
Indicative NQF Level 7
Student Contact hrs 56
Self-directed hrs 94
Other directed hrs 0
Total learning hrs 150

Learning Outcomes	On successful completion of this course, students will be able to:	NQF Sub-strand
1	Analyse the evolution of international air cargo in terms of types of cargo carried, use of different aircraft types, patterns of service provided globally and the changing role of air cargo agents	Theoretical Understanding
2	Evaluate supply chains and international air cargo operations using NETS theory with measurable and appropriate key performance indicators	Theoretical Understanding
3	Examine the debate surrounding environmental sustainability and the use of air cargo services	Theoretical Understanding
4	Outline how globalization processes, including the strategic importance of location in the Gulf States, security issues and technological advances may influence the outlook for international air cargo services	Practical Application of knowledge
