

Bahrain Polytechnic

بوليتكنك البحرين

Bachelor of
International Logistics Management

Programme Length

8 Semesters (Full-Time)

Programme Entry Requirements

Applicants need to be competent at English and Maths. They can show this by:

- Passing the required level on the Bahrain Polytechnic Selection Test, or
- Passing the Certificate in Academic Preparation

Introduction & Programme Aims

The transport and logistics industry is one of the sectors seen as critical to Bahrain's 2030 Economic Vision. This includes the different modes which, when joined together, are referred to as the global supply chain and are made of separate, yet interconnecting, industries. These industries include maritime, ports, aviation, road, rail, warehousing and logistics.

The Bachelor of International Logistics Management seeks to:

- Prepare students for leadership positions in a sector facing enormous challenges and opportunities.
- Provide students with the skills to manage change associated with the way transport systems and networks adapt to external circumstances.
- Develop students' ability to think critically and analyse opportunities arising from the adaptation and development of various transport modes and how to plan global supply chains and manage transport networks effectively.
- Raise awareness of growing environmental concerns in global and local transport, including energy supply, alternative fuels, and carbon emissions.

Students can choose to develop their understanding of one of four sectors that are viewed as critical to the future of the logistics industry in Bahrain. The sections are Maritime Logistics, Aviation Logistics, Supply Chain Management and Transport Security.

Graduate Profile

Graduates with a Bachelor of International Logistics Management will be able to:

- Problem solve logistics issues.
- Explain how land/sea/air transport networks work.
- Use analysis and critical thinking to develop solutions to transport and logistics problems.
- Understand how ports work in the global industry.
- Analyse critical issues of energy and transport.
- Apply principles of urban and regional transport planning in Bahrain.
- Analyse the environmental effects of the industry and seek solutions to the problems.

Career Opportunities

Upon graduation students can apply for positions in middle management and other roles as transport and logistics professionals, transport and environmental policy analysts, planning professionals and consultants, and leadership positions with transport service providers.

Students can seek careers in:

- Ports and Maritime Management.
- Aviation and Air Freight Management.
- Road and Rail Operations Management.
- Warehousing and Inventory Management.
- Supply Chain Management.
- Government Policy Development.
- Law Enforcement and Defence.
- Passenger Transport & People Movement Management.
- International Logistics Organisations.
- Urban Logistics and Traffic Flow Management.

Teaching and Assessment

Teaching will focus on a student-centred approach and developing learner autonomy. Level 7 and 8 courses are specifically aimed at developing the skills that a future manager in the sector requires. There is also a purposeful move toward more independent learning and research so the student develops advanced managerial skills. Students will be expected to think critically around problems, seek solutions and communicate in an industry specific way.

Qualifications

To be awarded a Bachelor of International Logistics Management, students must achieve 480 credits meeting specified requirements. Students may also study the required courses to receive the following embedded qualifications from the Chartered Institute of Logistics and Transport International:

- CILT Certificate in Logistics and Transport.
- CILT Professional Diploma in Logistics and Transport.

Students may also exit with a Diploma in Logistics and Transport upon achieving 240 credits which meet the specified requirements.

Accreditation and Partnerships

- Chartered Institute of Logistics and Transport (CILT UK).
- Chartered Institute of Logistics and Transport International (CILT*i*)
- The Bachelor of International Logistics Management includes embedded qualifications from the Chartered Institute of Logistics and Transport (CILT).

The Chartered
Institute of Logistics
and Transport

Industry Project

The more advanced courses focus increasingly on industry placement. The intention is to give students an industry experience prior to graduation as well as providing them an opportunity to develop their own industry networks.

Indicative Programme Structure

Year 1	Year 2
<ul style="list-style-type: none">• Managing in the Transport & Logistics Environment• Freight & Warehouse Operations• International Transport Geography• Humanitarian Aid & Disaster Relief• Introduction to Supply Chains & Procurement• Introduction to Information Systems	<ul style="list-style-type: none">• International Organisations for Transport & Communication• Passenger Transport Management• Managing Operations & Resources• Maritime Shipping Systems & Practices• International Air Cargo• International Transport Law• Introduction to Accounting
Year 3	Year 4
<ul style="list-style-type: none">• Urban Public Transport• Research Methodologies• Inventory & Warehouse Management• Economics & Finance• Aviation Security	<ul style="list-style-type: none">• Transport & Energy• Transport Communications• Industry Based Project (60 credits)
